How to write quran in ms word

Al Qur'an, the holy book of Muslims, can now be easily accessed from computers. With people relying increasingly on computers for tasks like writing documents and calculating data, the demand for software used in jobs is also rising. Microsoft Word, one of the most widely used software worldwide, allows users to write documents, reports, and journals with many functionalities. For Muslim students or teachers, inserting Al Qur'an into their documents or learning materials can be a common task. However, copying and pasting from the internet can be time-consuming and inefficient. To insert Al-Qur'an citations into Microsoft Word documents without this hassle, follow these steps: 1) Ensure you have Microsoft Word software (preferably Office 2010 or later) and an active internet connection for downloading resources. 2) Open your preferred internet browser and visit the Unduhan - Quran Kemenag website in Word - Lajnah Pentashihan Mushaf Al-Qur'an. 3) Before installing any application, download a font that supports Arabic writing. Click on the 'Download font' button under the specified font and sign it with red box or click this link: Download font 4) After downloading, open the zipped file using a file compressor like Winrar, Winzip, RAR, UltraISO, etc., and extract the LPMQ IsepMisbah.ttf font installation file. 5) Click 'Install' in the top left corner of the file to install the font. 6) Open the zipped file containing the installation files. For 32-bit computers, select QuranKemenagInMsWord-32-2.0.exe, and for 64-bit computers, select QuranKemenagInMsWord-64-2.0.exe. 7) In the installation setup, choose your preferred language (English or Deutsch), then click 'OK'. 8) Decide whether to allow all computer users or logged-in Microsoft Office account holders to use the program, and click 'Next'. 9) Choose where the program will be installed. If you're unsure, you can leave it as recommended. 10) Click 'Install' and wait for the program to finish installing successfully. 11) After installation is complete, open Microsoft Word. 12) You should now see the Qur'an Kemenag tab in your Microsoft Word. Customize its position by clicking on 'File > Options > Customize Ribbon'. 13) Clicking on this tab will display several settings and buttons, including: - Choosing a surah (chapter of the Quran) - Selecting verses to be displayed - Displaying multiple verses 14) Configure these settings according to your needs. With these steps, you can efficiently insert Al Qur'an into your Microsoft Word documents. 1. Cari dalam Al-Qur'an dan ayat untuk mencari kata-kata yang sesuai dengan keyword tertentu. 2. Masukkan apa yang diinginkan ke dokumen. 3. Tampilkan kalimat dari Ayat Al-Qur'an dan / atau terjemahan Al-Qur'an yang telah ditentukan dalam dokumen Microsoft Word. 4. Buat pengaturan ayat yang ditempatkan. 5. Buat pengaturan terjemahan ayat. Quran in MS Word is a small utility that adds a menu to MS Word, allowing users to browse and search the Quran for specific verses and texts. It supports versions 2003, 2007, and 2010 of MS Word and comes with powerful functions, such as an effective search function and the ability to use different sources for Quran translations. The software is free and easy to use.
