Yet it isn't evident for everyone which program a .mhtml file can be edited, converted or printed with. On this page, we try to provide assistance for handling .mhtml files. 1 filename extension(s) found in our database. Multipurpose Internet Mail Extension HTML .mhtml file related problems The MHT document files are related to Internet Explorer. MHT file is a Multipurpose Internet Mail Extension HTML. When you save a Web page as "Web archive" the Web page saves this information in Multipurpose Internet Mail Extension HTML (MHTML) format with a MHT file extension. All relative links in the Web page are remapped and the embedded content is included in the .mht file, rather than being saved in a separate folder. Application: Internet Explorer Category: Document files Mime-type: application/octet-stream Magic: - / - Aliases: mht, mhtml, mhtml, pptmhtml Multipurpose Internet Mail Extension HTML related extensions: mln Novell GroupWise Saved E-Mail .ccz DxDesigner Compressed PCB Layout .sb1 MemoryMixer Album .mell Mellel Word Processing Document .mellel Mellel Word Processor Document .mldp Simulink Protected Model Naturally, other applications may also use the .mhtml file extension. Even harmful programs can create .mhtml files. Be especially cautious with .mhtml files coming from an unknown source! Can't open a .mhtml file? When you double-click a file to open it, Windows examines the filename extension. If Windows recognizes the filename extension, it opens the file in the program that is associated with that filename extension. When Windows does not recognize a filename extension, you receive the following message: Windows can't open this file. example.mhtml To open this file, Windows needs to know what program you want to use to open it. Windows can go online to look it up automatically, or you can manually select one from a list of programs that are installed on your computer. To avoid this error, you need to set the file association correctly. Open Control Panel > Control Panel Home > Default Programs > Set Associations. Select a file type in the list and click Change Program. The .mhtml file extension is often given incorrectly! According to the searches on our site, these misspellings were the most common in the past year: hhtml, html, mhtl, mhtml, mtml Is it possible that the filename extension is misspelled? Similar file extensions in our database: .html Realmedia Adstream HTML .mtml Meaningful Text Markup Language Data .html Hypertext Markup Language Document .mhtml Multipurpose Internet Mail Extension HTML Operating systems DataTypes.net currently supports the following operating systems: Windows XP/Vista, Windows 7/8, Windows 10, CentOS, Debian GNU/Linux, Ubuntu Linux, FreeBSD, Mac OS X, iOS, Android If you find the information on this page useful, please feel free to link to this page.
