Die Dateien, die von 2013 bis 2016 datiert sind, enthalten Details zu den Softwarefunktionen der CIA, wie z.B. die Mglichkeit, Autos, Smart-TVs, Webbrowser (einschlielich Google Chrome, Microsoft Edge, Mozilla Firefox und Opera), und die Betriebssysteme der meisten Smartphones (einschließlich Apple iOS und Google Android) sowie andere Betriebssysteme wie Microsoft Windows, macOS und Linux zu kompromittieren.[1] Die CIA zeigte sich besorgt ber die Verffentlichungen.[2] ging aber von der Echtheit der verffentlichten Dokumente aus.Im Juni 2018 wurde der ehemalige CIA-Mitarbeiter Joshua Adam Schulte angeklagt, die geheimen Dokumente an Wikileaks weitergeleitet zu haben.[3]Nach der Verffentlichung von Vault 7 erwog die CIA, den Wikileaks-Grnder Julian Assange zu entfhren und zu ten.[4][5]Joshua Schulte wurde von einem Bundesgericht in New York am 1. Februar 2024 zu 40 Jahren Gefngnis verurteilt.[6] Von den 40 Jahren Haft entfallen aber 6 Jahre und acht Monate auf eine Verurteilung wegen Besitzes von Kinderpornografie, die nach Angaben der Behrden auf Schultes Computer gefunden wurde.In einer anschlieenden Erklrung sagte US-Staatsanwalt Damian Williams, Schulte habe sein Land verraten, indem er einige der dreistesten, abscheulichsten Spionageverbrechen in der amerikanischen Geschichte begangen hat.[7]Der ursprngliche Prozess gegen Schulte im Jahr 2020 endete mit einem Fehlverfahren, da sich die Geschworenen bei den schwerwiegendsten Anklagepunkten uneinig waren. Im Juli 2022 wurde er jedoch in einem weiteren Prozess im Zusammenhang mit der Verschlussache verurteilt.[8]Homepage von WikileaksVault 7: CIA Hacking Tools Revealed In: Wikileaks, abgerufen am 15.
