So my experience when I ordered Nova fashion for the first time last week is exactly the reason ia m by writing this review, as well as why I ordered more clothes two days later. I ordered five elements, all inexpensive and really nice. I was hoping they would be as cute as a person as they were online. They came and seemed exactly as they did on the app my clothes, the quality was incredible, and the sizing was true in size except for a body that was honestly my fault because I didn't read that the material wasn't very stretchy. But now I know to order a size more and I definitely the purchase that the suit if and when it is once again, only in a larger size. I decided to choose during the night + Saturday shipping (I made an order on a Thursday). He got my order on Saturday morning. I was skeptical if it was or it wasn't really going to come on Saturdays, but I did it and I was really happy with how quickly came and how easy it was to monitor. After shopping here once, honestly ca ± to even see me shopping in any other online store. Now for the application ... I had absolutely no problem with glitch as others have described. Maybe IA € are just lucky, but so far the application has went well and I have no problems with my favorites or clothes in my cart. Add that I received transport standards this time and I hoping that it still came into a timely manner. I'm going to update this time I see how long it takes for me to get my clothes W the standard. Overall a good app, they have cute clothes (although I tend to be a cheap person so I want more than it was cheaper, but that's just a personal haha problem) which are generally good good Something Ia D Love (and Ia I am sure it would be really useful for others) is for them to have the chance to include a photo when you write a review - obviously clothes are going to look great on models because they have chosen people whoa S bodies adapt social norms most, but it's nice to be able to see what their clothes seem to be on average person before buying, because the body does not arrive with clothes, haha. IA D definitely buy more dressed by them if that was a feature of the app, but I ia M usually reluctant to because it gives me t want to waste my money on something that's cute but I have no way of saying if it's about il Look good about me. It would also be nice if for each product they listed which size the model was wearing. There is the text that says what their models no longer sizes wear (a top and clothes are small size and jeans / pants are sized 1-5), but no information for what their plus size models They wear. These features are things that many other clothing applications and would help your customers buy things they want with more confidence. Shouldn't being so difficult to do. It's ok so :) I love love fashion Nova, my wardrobe is composed of 99.9% of Nova fashion and then that 0.1% is Boohoo. My problem is the application. At first it was love at first sight. After Hearting Articles (save for later) and the addition of things to my cart and make the purchase, the customized application selections in suggestions on what you could like and with my surprise was extremely accurate. However, one day my rescue to the lather disappeared. I forced closed and open again and they checked backup. I was as well without any problem and continued shopping and adding elements to my save for later, when I realized the elements from the heart would disappear how I would have continued to scroll through everything I saved for the last time After Didn't also be saved. I went to my save for later and everything went. Once again I said no problem and I would just like text to me I wanted to buy my save for later. However, just yesterday I went to my cart to buy my items 50% of my cart was empty. Not because it was out of stock, because it allows me to know when I go to check what's out of stock. My articles just glitched out of my wagon. It made me crazy because I spent days collected and choosing clothes to put together only for them to get disappear again. I had enough and deleted the application. Then I went to the site and started completely with a new series of elements. Please correct the application sincerely I prefer maneuver on what to go online, because the application is simpler.
