Best offline civilization games for android. Best civilization type game for android. Best civilization building games android.

Best Games Civilization VI was first released in 2016 on PC. Over the years, it has expanded to about every platform and has continued to gained popularity. If for any reason, you are looking for an alternative to Civilization VI, then you have come to the right place. In this post, we will share with you our list of the 5 best mobile games like Civilization. We will also keep updating this list from time to time, adding and removing games so that you can always come back for the best mobile games like Civilization. About Civilization VI In Civilization VI, you try to build the world's greatest empire. It's a strategy game which is free to download. You pick one of several dozen leaders and then guide your tiny settlement through the ages until it's a bustling metropolis. As you progress, you participate in massive turn-based battles, discuss political affairs with your neighbours and slowly gather more resources. You get the first 60 turns for free, after which you are given an option to upgrade to the premium version to continue playing. Civilization VI is one of the best strategy games on mobile. If you have already played any of the previous games in the Civilization series, you probably agree. Though it makes no sense to compare the mobile and PC versions, if we were to do that, we would say there is absolutely nothing that the mobile version is missing. Furthermore, since it's free-to-play for the first 60 turns, you can try it and decide for yourself if you want to buy it. You can get it for iOS through the App Store, while for Android, you can download it from Google Play. So let's not waste more time and dig into our list of the 5 best mobile games like Civilization. Click Here To View The List » Developed and published by InnoGames, Forge of Empires: Build a City is a popular strategy game released in 2012 on the web browser. It later came to iOS in 2014 and Android in 2015. Even though it's one of the oldest mobile games on the list, the developer's regular updates have kept the game fresh and entertaining. In Forge of Empires, you have to expand and develop a city, evolving from the Stone Age to the colonization of Jupiter Moon. You also have to build and manage an army with different types of battle units and plunder your enemy's cities for resources. On your journey to the modern-day and beyond, you get to research technologies and unlock new buildings and decorations. Forge of Empires is free-to-play. You can get it from Google Play or the App Store. If you enjoy games like Age of Empires and Tropico, you will love Townsmen. It's a classic city-building strategy game. You build the city of your dream, fulfill the needs of your citizens and master great challenges. Of course, you will also have to deal with raging disasters and protect your town against bandits. Read more: Best mobile games like Hades Best strategy games for iPhone and iPad Developed and published by HandyGames, Townsmen is one of the best city-building strategy games you can download on mobile today. It's free-to-play and features a complex economy simulator and deep production chains. If you are looking for an alternative to Civilization VI, then Townsmen is probably the best option. It's similar to Civilization VI but more casual, easy to learn and free-to-play. You can download Townsmen from Google Play or the App Store Tribal Wars 2 is the sequel to the popular real-time strategy game Tribal Wars. Like the prequel in Tribal Wars 2, you must build and expand your empire, make friends with other players to form mighty tribes, and protect your people against enemies. It features 16 different types of buildings and 13 types of units. What's best is that you can also trade resources with other players in real time. It's another game on the list developed and published by InnoGames. It's available on browser and mobile. You can use the same account to play across devices. Tribal Wars 2 is a free-to-play title. You can download it from Google Play or the App Store. World of Empires 2 is very much like Civilization. They are graphically very similar and even the map is built using hexagonal tiles. It has been developed and published by Bruno Fagnoli and features many civilizations, troops, buildings and technologies to research. It also has procedural world generation and a map editor. As in all the Civilization games, in World of Empires 2, you can win by battle, diplomacy or by becoming the most powerful economic force. It's a simple strategy game that is easy to learn. It's one of the best alternatives to Civilization if you want to go more casual. World of Empires 2 is a free-to-play title, and you can download it from Google Play or the App Store. Last on the list, we have The Battle of Polytopia. It's a turn-based strategy game developed and published by Midjivan AB. If I were to pick my favourite on this list, it would be The Battle of Polytopia. In The Battle of Polytopia, you get to choose one of 12 distinct civilizations and lead them towards victory by expanding your empire, researching technologies and becoming the most powerful economy in the world. It features both single-player and multiplayer game modes, supporting up to 15 players. The Battle of Polytopia was released initially in February 2016 on iOS. Later in the same year, it expanded to Android. A fun fact, it's also available to play in Tesla cars. The Battle of Polytopia is free-to-play. You can download it from Google Play or the App Store. With this, we come to the end of our list of 5 best mobile games like Civilization. If you think we missed out on anything that should be on this list, please let us know in the comments below. Next Up: Top 9 best iPhone and iPad (iOS) exclusive games Sign up! Get Pocket Gamer tips, news & features in your inbox We're rounding up some of our favorite strategy games on Android for the deep thinkers out there. These are more than just simple puzzle games — these require careful planning and forethought to emerge victoriously. You'll find some great replay value in games like these as well since the same strategy won't always work twice. Strategy gamers, pop on your thinking caps and get downloading these outstanding Android games. And if you're looking for the best games in other genres, we have those, too. Bad North Bad North is one of those unique games that comes along every so often and wows us all. The developers describe it as a real-time tactics roguelite, which suits it quite well. It's a challenging game, make no mistake, and even the win state isn't all that happy. See, you're trying to defend on your island home from a host of Norse invaders. They'll come at you fast and brutal, ensuring that you're kept on the edge of your seat as you fight just to survive. All of this pairs nicely with the cutesy art style. It's a pretty game that lulls you into a false sense of security. Bad North is a premium game, meaning you pay once and you're done. It's a low cost to entry, too, and you'll get plenty of enjoyment out of it. Go ahead and give it a shot, see if you can survive the Viking onslaught. If you're a fan of the Civilization franchise, you just have to check out The Battle for Polytopia. This indie game features polygon tribes battling for control of the battle arena. The game features simple turn-based gameplay that's quick and easy to pick up and play. Each turn, you collect stars based on the number and size of the cities you control, which you can spend on upgrading your tribe's technology tree, building troops, or collecting resources. You must be wise with how you spend your resources and position your troops on your turn. There are multiple ways to play. For solo play, you can create a custom game that either ends after 30 turns or until only one tribe remains. There's also the rarely seen pass-and-play multiplayer option, which lets you set up a custom game among friends and even keep them saved so you can play the same game over time. If you aren't able to play in person with friends, the AI offers a pretty decent challenge with difficulty levels ranging from easy to "crazy". There are four tribes available to you when you download the game, with six others available via in-app purchases. Bloons TD Bloons TD is a well-known and well-loved tower defense series that's been around for a while. You play as a bunch of monkeys defending your lands, using a variety of towers and upgrades to do so. You have 21 to choose from, all of which include three upgrade paths for you to choose from. You also get offline play, additional difficulties, and a whole lot of fun. You have to pay five bucks up front and then deal with optional IAPs for faster and/or extra unlocks, none of which are necessary to make the game playable. While I would prefer that these weren't added to a premium title, at least the game itself isn't hindered if you don't fork over extra cash. Card Thief Card Thief is a nice hybrid between a card game and a strategy game. Stealth is the name of the game; you play a thief who must sneak their way through a deck of cards collecting treasure while avoiding detection. You can use equipment cards to assist you in your thieving ways, too, but don't get too cocky or you'll run out of sneak points and get caught. You'll do things like extinguish torches, pickpocket guards, and other dastardly shenanigans. Card Thief features daily challenges and deep strategies, and a nice progression system that lets you upgrade equipment cards as you pull off heists. There's a bit of steep learning curve involved here, but it's a rewarding game for fans of strategy card games. Chess Pro Chess is a timeless classic and AI Factory Limited's version is our favorite app-based version. It's simple enough to draw in all kinds of players, yet it still has plenty of features to keep people of all skill levels interested and invested. There are two versions: free ad-supported and paid, ad-free (with some additional features like five extra boards). AI Factory Limited has made a name for itself recreating classic board games for Android and we've featured it on some of our other lists. You have 12 levels of play (from Novice to Expert) and a choice between Casual and Pro modes. There's a built-in tutor, insight into the CPU thought process, stats, achievements, leaderboards, and ELO ratings. That's not even everything included here, but if you want chess on your Android device, this is the one we recommend. Crying Suns Often compared to Faster Than Light as a quick reference point, Crying Suns is strategy roguelite set in a massive, crumbling cosmic empire. You play as the clone of legendary admiral Elys Idaho and you've been brought back into life anew by a hyper-intelligent robot who wants your help. Armed to the teeth with the best spacecraft available, a skilled but expendable crew, and a fleet of squadrons, you set off toward what was once the center of the empire to find out why communications have suddenly stopped. Along the way, you'll encounter space pirates, abandoned colonies in dire need of help, new crew members, and more. It's a careful balance to decide how you want to proceed, as your resources are finite and dangers are many. One wrong call can result in a game over, sending you all the way back to the start to give it another try. Gameplay is solid, but the UI can feel a tad cramped on smaller screens. All the same, Crying Suns is top-tier sci-fi strategy in the palm of your hand. This caliber of mobile gaming doesn't come cheap though, so expect to fork over \$8.99 to pick this bad boy up. However, Crying Suns is free for Google Play Pass subscribers and it's arguably one of the best games available on the service. The Escapists 2: Pocket Breakout All of the strategy games that appear on this list, The Escapists 2 offers the player the most freedom for strategizing an epic prison escape. If you played and enjoyed The Escapists (opens in new tab) you're sure to love the sequel, which has been better designed from the start for mobile with enhanced touch controls and multiplayer features added for the sequel. Once again, The Escapists 2 is all about the thrill of a perfectly planned prison break. There are multiple ways to break out of each prison that require you to steal supplies to craft items, earn money which can then be used to bribe guards, or just craft weapons to cause a straight-up prison riot. In your downtime, you can train your prisoner in the library or gym so that you can outsmart and outrun your captors, but you'll have to be sure to keep up with the daily prison routines to avoid suspicion. There are five prisons to escape from — starting in a basic jail and ramping up to challenging maximum security facilities — and you're able to scheme and play with friends over local multiplayer which is one of the coolest new features added to the franchise. Enyo Enyo feels a lot like playing chess, except it's actually fun. I kid, I kid, chess is fine and dandy, but Enyo takes that same vibe and puts an interesting twist on it to create an experience that feels familiar, yet new. You play as Enyo, the Greek goddess of war, on her quest to recover three legendary artefacts from a shifting labyrinth. You'll have to battle your way through boards filled with enemies, but here's the catch — Enyo can only move between spaces by using her shield bash and hook abilities. Boards are peppered with environmental hazards that pose a threat to both you and your foes, which makes the limited movement even more critical. It's particularly satisfying to take out an enemy by pushing them into a pit of boiling lava. The game's concept is easy to pick up but takes time and effort to master, which you could argue is the mark of a truly good strategy game. One of my few small complaints I have about this game is that Enyo herself can be a little hard to pick out on the game board because her design and coloring are so in line with the enemy designs. It's not a deal-breaker, but I did find myself visually losing my place every now and then. The free version includes basic game mechanics and modes, but you can unlock additional content through in-app purchases. There are also occasional ads, but again, for a free game this one packs some quality strategic content into a great setting. Fire Emblem: Heroes Fire Emblem: Heroes represents one of Nintendo's first foray into publishing games for Android and is the eighth title in the popular strategy-RPG franchise to be released on North American shores. Heroes brings all of your favorite Fire Emblem characters together for a brand new story that pits the noble Askran Kingdom against the power-hungry Emblian Empire, which wishes to rule all worlds. You play the role of a mighty summoner who has the power to bring Fire Emblem's best heroes together to help defend the kingdom. Battle takes place in arenas where you must strategically move your Heroes around to attack and defend against your opponents. Play through the Story Mode to unlock new game modes, including Special Maps, Arena Duels, and the Training Tower. Arena Duel is the multiplayer aspect of the game that will keep you busy beyond the single-player campaign. Gwent If you played The Witcher 3: Wild Hunt, then you should already be at least somewhat familiar with Gwent. This game started off as a mini-game within The Witcher and kind of blew up from there. Featuring spectacular card art, it had a simple premise like many of these card games do. For many of us, it added several more hours to an already massive game. Developer CD Projekt Red broke Gwent out into its own spinoff, complete with improved card art and expanded decks. And then, after quite a while, they brought it to Android and boy was I excited. It's a massive download, but I think it's well worth it. I'm not usually a fan of card games like Hearthstone, but I really enjoy Gwent. Being free, it does contain microtransactions, but like other games that do it well, I've gone through many hours of Gwent on my phone without spending a cent. If you enjoy the world of The Witcher, whether you've read the books, played the games, or watched the Netflix show, then you'll find something to like in Gwent. Hello Neighbor Hello Neighbor is a stealth horror puzzle/strategy game. Basically, you're a snoopy neighbor who's spying on a fellow neighborhood resident. Said person is up to something and you're determined to find out what he's hiding in his basement. You'll be breaking into his house over and over, but he learns your patterns each time so you'll have to come up with a new strategy by circumventing what he's established. This game will run you a pretty penny, but I think it's worth it if you want a strategy/puzzle game with horror elements. It's definitely a weird premise, I'll admit, but I think it's pretty fun. It's free to install and try, but then you'll be asked to fork over the \$15 to unlock the full experience. Heroes of Flatlandia Turn-based games have captured the hearts of many throughout the decades and it's a paradigm that's perfect for a strategy game. Such is the tale with Heroes of Flatlandia, where you choose your hero, raise your army, and face off against your enemies in fierce battles. You get to choose between eight different heroes and utilize 30 different unit types across four races. The game looks great, even if it might not have enough hardcore strategy for some fans of the genre. Still, it's a fun time with tactics for a couple of bucks. There's also local multiplayer if you're interested in that. HoloDown HoloDown is a frantic puzzle game that mixes in a healthy dose of strategy. The game has you mining to the core of celestial bodies — starting with an asteroid and working your way up to the Sun — using bouncing miner balls that ricochet off of colored blocks. Each brick has a number that represents the number of hits needed to destroy it. You can let gravity do most of the work by destroying a block supporting other blocks and some are bolded in place and must be destroyed. It's easy to pick up and play this game, but that's when the strategy comes in. All the bricks are curved, allowing you to set up tricky bank shots to clear out massive sections of blocks in one go. This will become quite important as the screen moves up one row after every shot. If the blocks reach the top of the screen, it's game over. Along the way, you will collect crystals which are spent on upgrades that give you more balls per shot, and more shots per round. These upgrades are crucial to completing the later planets but also let the earlier levels become more of a mindless distraction for your subway commute. If you're a fan of physics-based puzzle games and are looking for a new obsession, HoloDown is well worth your money. Legends of Runeterra Rounding out our card games for this list is Legends of Runeterra. Riot Games' answer to Hearthstone. Featuring heroes from the League of Legends universe, Legends of Runeterra functions similarly to Hearthstone and Gwent. It's by no means revolutionary, but people looking to get away from the Warcraft universe into another fantasy realm should consider this one. I'll be honest, I never played League of Legends. It never appealed to me, so I had no idea what was going on when I launched Runeterra. Even so, the tutorial is thorough enough for you to feel like you've got a grasp on how to play. Even though they're scripted events, it still feels nice when you outwit the AI. Legends of Runeterra is also free, complete with microtransactions. Riot doesn't have the most favorable reputation out there, but Legends of Runeterra shows plenty of promise as a potential Hearthstone competitor. Mindustry Mindustry is a true hidden gem among the crowded tower defense games in the Google Play Store. Rather than holding your hand through preset levels, the game offers a complete and open sandbox philosophy where you're given the tools required to build up your defenses before waves of enemies give them a test. The intimidating and challenging gameplay is more robust than most mobile strategy games, and best of all, it's a free download with no ads or in-app purchases. There's a lot of logistical thinking required to find success in Mindustry. Not only do

you need to concern yourself with mining resources to build up your defenses, but you also need to maintain and protect your supply lines — conveyor belts that deliver your mined resources from the drill to your core base and defense turrets. The learning curve is quite steep when you're just starting out, but once you get a handle on the basics and start unlocking new technologies on the tech tree, Mindustry starts to open up. The solo mode is a great place to start and practice your own strategies, but only scratches the surface of all that Mindustry has to offer. There are multiplayer modes available for custom servers or local play over LAN with the host able to fine-tune settings to tweak almost every aspect of the game. You can also create your own custom maps with the included map editor. It's an amazing game that's continued to develop and grow over the past four years while remaining free for Android gamers.

Mushroom Wars 2Mushroom Wars 2 is an award-winning real-time strategy game that has you controlling tiny armies of mushroom soldiers in online or offline battles. Available on Android, this game features beautiful graphics and gameplay that's easy to learn but challenging to master.Your goal is total domination, which requires you to move your troops across the map, taking over strategic mushroom huts and other structures while defending against advances from your enemy. There are four Mushroom tribes to choose from with a full campaign episode available for each, but the real action begins with the online multiplayer. You'll need to keep your wits about you as you balance your troop levels, build morale, and use special skills to dominate your opponents.Night of the Full MoonNight of the Full Moon is a charming, card-based strategy game that puts you in the shoes of Little Red Riding Hood on a quest to find her grandmother during a full moon. Red must venture into a mysterious forest and battle her way through all manner of folk creatures like werewolves, witches, and more. The game shines in its simplicity, choosing not to overcomplicate its solid gameplay with unnecessary trappings. You can even skip the tutorial if you want!

Night of the Full Moon features gorgeous graphics, decent voice acting, and tons of cards for you to collect, level up, and build into your own decks. You can make things even more fun by switching out your occupation to things like ranger, nun, or magician. There's a lot of fun to be had packed into this great deck-builder and the difficulty level in the strategic elements is pretty beginner friendly, to boot. Night of the Full Moon is free with ads and in-app purchases, but you can also get the ad and IAP-free version if you're a Play Pass subscriber.

ROME: Total WarConquer the ancient world in ROME: Total War. This game features massive turn-based battles, 19 factions to choose from, and touchscreen-optimized controls. Your goal is to conquer everything, whether you're Roman, Egyptian, Macedonian, or any other historic empire-to-be. There's more than just winning in the cruel, gruesome game of war; you also need to see to your civilization's political, economic, and religious affairs. There's actually three ROME: Total War games on the Play Store, so be sure to check out the Barbarian Invasion and Alexander variants if you like this one.

Ported by the excellent team over at Feral Interactive, ROME: Total War features many hours of a campaign, plus plenty of replayability.

Tiny GuardiansIn the crowded genre of tower defense strategy games, it can be hard to stand out. Luckily for Tiny Guardians, it has a twist to give itself some originality: it's a tower defense game...without towers. Tiny Guardians flips the standard formula on its head by moving the player's forces through levels rather than just set up defenses and wait for the baddies to perish trying to get through them. The core of the strategy comes from trying to get your main character, Lunalie, to the end of each level safely by summoning in the right troops to back her up. There are twelve different guardian types for players to experiment with and each guardian can be upgraded up to four times. Levels have both story and challenge modes and there's a good variety of enemies to pit yourself against. The graphics are cute, but definitely not the most cutting edge out there. Another plus is that there are no ads and the game's in-app purchases are reserved strictly for cosmetic items. Best of all, Tiny Guardians is free for Google Play Pass subscribers. For non-subscribers, it'll cost you \$3.99 for a solid, good quality strategy experience.

TropicoRunning a whole country is hard, but it helps when you're a dictator and can run everything just how you like it. This is Tropico in a nutshell, a game where you step into the role of El Presidente of your own Caribbean island paradise and lead your country and its people into the glorious future. You're put in charge of managing all aspects of life and society on the island, building new roads and structures, training your citizens with schools and military bases, managing the economy by building farms and industries while setting workers' wages and negotiating export deals with other nations. That's not to mention managing the politics of the island, keeping people happy by improving the quality of life and quelling protests before they turn into full-blown rebellions. There's a lot of strategy involved here, as you need to be sure that the structures you build are properly staffed, which might require building better schools or bringing in specialized foreign workers. You'll also get regular updates from your advisors about issues brewing around the island that often require you to choose between a benevolent approach or a more hardline response to show who's in charge. The scope of the game is absolutely overwhelming, which is why you'll want to start with the tutorial that guides you through menu navigation and how to control the floating camera with touchscreen controls. The camera controls, in particular, take some time getting used to, but everything else is laid out sensibly enough for mobile devices so that you should gain a firm grasp of everything by the end of your first campaign. There are 15 campaign islands to complete that give you specific goals to complete, but there's also a sandbox mode that just lets you take charge and rule your country however you see fit. This premium title includes no in-app purchases or ads and is an especially great title for fans of construction simulators.

XCOM is a celebrated turn-based strategy franchise that tasks you with stopping aliens from invading earth. As an XCOM commander, you're tasked with controlling your team of troops as they set off on missions to take out aliens.

XCOM: Enemy Within is an expanded version of the game XCOM: Enemy Unknown and adds a new array of abilities, upgrades, and weapons to help you counter the alien threats. It's been out for several years now but still holds up as one of the best strategy game experiences for Android. Each turn, you can control your troops and move them into position around the mission map to counter the advancing aliens. After completing missions, you'll head back to the XCOM HQ where you'll be able to upgrade your troops and unlock new abilities based on your success in the field.

XCOM: Enemy Within is a full game that's available for \$10 from the Google Play Store.

XCOM: Enemy WithinPlenty to think overNo matter the exact flavor you prefer, there's plenty of strategy games to enjoy on your Android devices. Naturally, one of the best Android tablets will provide a better playing experience, since you'll have more room to see everything that's going on. For game recommendations, generally speaking, going for a premium paid game will be the best choice. You do have to pay a small fee, but you usually don't have to put up with ads or microtransactions afterward, which means a better playing experience. Mobile title like Bad North: Jotunn Edition and ROME: Total War fall into this category.
