Skyrim legendary difficulty guide re

Skyrim best legendary difficulty build. Skyrim legendary difficulty benefits. Skyrim legendary difficulty guide reddit. Skyrim legendary difficulty difference.

Your archery will level up quickly, you will also get levels of turmoil. I wanted a North with two hours of gun and light armor. It's 2. Solitude's potion shop is a great place to get Enchanter's Elixirs and Blacksmith's Elixirs, but it may take a lot of attempts to make them appear in the seller's inventory. The rest, all this grinding ability, I say let it happen the way it does and play. All three of these abilities are very important in the legendary difficulty. However, giving your follower a single high-level arrow will help significantly because it will give them an infinite supply of hidden arrow. You can then create iron daggers with Smithing and enchant them to level your Smithing and Enchanting. You can trap creatures in the gems of the soul with the Soul Trap spell to level your Constellation. Smith all up first, put some spells on as many items as possible (assuming you brought gems with you and used soul-trap), then sell everything for extra gold. Not so much now. Make sure you keep all the beast leather and create leather straps for use in Smithing. It's about "grinding" as much as I do, and only because it's fun. It's 5. So I want to go back to Skyrim and start with legendary difficulties. The quickest way to level Smithing is to find or buy iron ingots and dwarf ingots and use them to create iron daggers and dwarf bows. The Frostflow lighthouse on the map has a search that increases the power of your healing spells by 10%. Giving your follower a powerful bow is not necessary because your follower will simply return to their default bow after a short time. You can run the inventory cycle of the stores using the in-game wait option for 48 hours until they appear. Lydia received at the beginning of the main mission, it has great defenses with a shield, and uses heavy armor that will help you keep it alive and fight on legendary difficulties. She runs like an idiot, of course, but every time you see it, make an attempt attempt 5. Your follower will not jump at the lower level during boss fighting so, having a frost atronach to tank is highly recommended for the final part of the dungeon. The weapons enchanted by the Banish spell are the best objects to be enchanted and selling for profit, but the banish spell can be a little rare to find. The followers do not receive penalties for the difficulty that affects the player. Å ç à ¢ Å
