The accounts may vary depending on the service and depend on the availability of their data. Countries will be updated every day once available Altmetric calculates a score based on the attention an article receives. Each colored thread in the circle represents a different kind of attention online. The number in the center is the Altmetric score. Social media and mainstream media are the main sources that calculate the score. Reference managers such as Mendeley are also monitored, but do not contribute to the score. Older items often get a higher score because & A they had more time to make themselves known. To keep of this, Altmetric has included the contextual data for other articles of the same age. age.
