With this, this, They can access all the files of your smartphone on the Windows or Mac PC. Alternative methods and emulators alternatively, you can try the emulators listed below to install Xender App on your PC and Mac For Free. How to install Xender App for PC (Windows and Mac) There are 2 methods to install Xender on your Windows 7, 8, 10 or Mac PC. Method 1: Install Xender App on the PC using BlueStacks first of all, you need to download BlueStacks on Private PC (Windows / Mac) from the link shown below. Double-click the file you downloaded to install Android Emulator BlueStacks on your PC (Windows / Mac). Launch an installation wizard. Just follow the instructions on the screen and the installation will be done in a few minutes. Once installed. Click on the BlueStacks icon on your desktop to start the emulator. Open Google Play Store and type an Xender in the search bar. Find the Xender application from the search results that appear and click Install. Xender will be installed on your PC (Windows / Mac) take a few seconds. After clicking successfully installed on the Xender from the BlueStacks home screen to start using it. Method 2: Install Xender app on the PC using NOXPlayer first of all, you need to download NOXPlayer on your PC (Windows / Mac) from the link shown below. Install NOXPlayer Android emulator on your PC (Windows / Mac). Open the Android NOXPlayer emulator. Open Google Play Store and type an Xender in the search bar. Find the Xender application from the search results that appear and click Install. After clicking installed on the Xender from the main screen to start using it. Alternatives of Xender This alternative Xender (previously known as MIDROP) also allows the transfer through the direct P2P WiFi function. It allows the transfer of all types of files to multiple devices. AirDroid is a free app that lets you access and remotely manage your Android smartphone or tablet computer. It is more than a file transfer question that allows you to listen to messages, take pictures, or record video in remote mode. The application Premium costs \$ 2.99 for each month, with unlimited files, more functions, and a free ad. ShareIt is not sophisticated as airdroid, but offers file sharing between supported devices by scanning QR codes or entering access codes to create connections. Connect directly to other devices on the same Wi-Fi network, share files, watch the news, video, and listen to music in offline mode is not the norm, but a good alternative. Conclusion Xender is one of most popular worldwide sharing applications for both Android and PC. But you can also use the Android application on the PC using an emulator to get its complete features. If you want something more, you can also check its alternatives. Alternatives.
