

I'm not robot

Simplified actionable recipes for managing Active Directory and Azure AD in Windows Server 2022 are covered in this updated edition. Key features include expert solutions for name resolution, federation, certificates, and security, as well as automation of security tasks using Active Directory tools and PowerShell. This book provides a comprehensive guide to effective administration on-premise and in the cloud. It focuses on forests, domains, trusts, schemas, and partitions, allowing you to manage domain controllers, organizational units, and default containers. Windows PowerShell for Automation Tasks Create and manage Active Directory objects, set up certificate authorities, and optimize security. For experienced administrators seeking to streamline their tasks with PowerShell, this book provides a comprehensive guide. It covers topics such as domain management, group administration, and permission delegation. Required Software and Hardware - Microsoft Windows Server 2022 - Microsoft Local Administrator Password Solution (LAPS) - Microsoft SQL Server 2019 - x.509 TLS certificate Author Sander Berkouwer is an expert in Active Directory and Azure AD with over a decade of experience. This book includes a PDF file with screenshots and diagrams, as well as free access to the DRM-free PDF version for those who have purchased the print or Kindle edition. Unlocking Success Together: Leverage the Power of O'Reilly's 60K+ Titles with a Free 10-Day Trial. For the most pressing challenges in Microsoft's network directory service, Active Directory Cookbook, 3rd Edition delivers swift solutions to over 300 common problems. With recipes crafted by Windows administrators and expert Laura E. Hunter, tackle tasks from command-line execution to scripting automation. Master new features like Read-Only Domain Controllers and fine-grained password policies. Automate domain creation, locate users with expiring passwords, apply security filters, check replication issues, restrict hosts, view DNS statistics, and more. Each solution comes with a discussion on how and why it works, ensuring adaptability to similar situations. Ideal for IT professionals using Windows Server 2008, Exchange 2007, and Identity Lifecycle Manager 2007, including Active Directory administrators seeking task-based solutions. Tony Murray, Founder of Activedir.org and Directory Services MVP, praises the Cookbook's concise and clear recipes, suitable for everyday AD tasks. Tony highlights the introduction of PowerShell examples in this edition as a valuable resource for transitioning from VBScript. Joe Richards, Directory Services MVP, endorses the book as a quick solution to common Active Directory related tasks, ideal for those already familiar with Active Directory fundamentals. Gil Kirkpatrick, Chief Architect, Active Directory, commends the Cookbook as the ultimate catalog of administrative tasks for Active Directory administrators, a must-have on their shelf. Managing Enterprise Identity Infrastructure with Active Directory
