Fortnite Apk App File Info: App Name com.epicgames.fortnite.apk File Size 173MB Latest Version v15.10.0 Operating System Android 8.0 and up Developer Epic Games Updated On 6 January 2021 Google Play Store Not Available Why Was Fortnite Banned From the App Store? Yesterday, Fortnite creator, Epic Games, introduced a new in-app item purchase option that allows players to buy stuff at a discounted price that is normally available via App Store or the Play Store. This move prompted swift action from both Apple and Google as both tech giants decided to scrap the game entirely from their respective app stores thus making it unavailable to their massive userbase. This is owing to Epic Games consistently raising their voice about the high 30 percent cut that Apple and Google charge for each purchase made through the apps downloaded from their stores. According to the game company, this undercuts profit margins for developers which they could otherwise better deploy on further enhancing gameplay mechanics and development costs in the future. As the first round of this bout ends it seems Epic Games Studio is not going down without a fight. Following the announcement that Apple has revoked Epic Games' license due to violation of App Store terms and conditions applicable to Epic Games allowing a separate in-app payment system, Google soon imitated the move to strike out the game developer from its Google Play Store as well. The Fortnite maker, perhaps anticipating the expected response from the Cupertino company, released the following video (see video below) mocking Apple's iconic 1984 ad based on George Orwell's seminal novel by the same name and directed by Ridley Scott.
