Go to robloxjailbreak r/robloxjailbreak • Русский高体中文PolskiSrpskiTürkçeČeština NOTE: All mph readings have been rounded to the nearest 5mph. Vehicles that have "two" top speeds: the first (higher) speed is the "peak" top speed which the vehicle initially reaches, but due to bad gearing, vehicles may gradually drop to a slower speed by themselves, which is listed as the second "true" top speed. \$500k+ veyron - 480mph torpedo - 360mph chiron / bolide - 280mph concept - 275mph trailblazer / m12 / airfall -240mph volt - 215mph roadster - 210mph toren - 200mph icebreaker - 195mph agent - 185mph jet - 165mph blade / lia - 165mph monster - 160 / 140mph drone - 140mph arachnid - 140 / 130mph army heli - 130mph UFO - 105mph tank / sloop - 75mph \$100k+ MCL36 - 250mph volt 4x4 - 240mph ferrari - 235mph banana - 220mph firetruck - 200mph surus - 190mph sentinel / beam / paid nascar - 185mph R8 - 180mph C8 - 175mph rattler - 170mph mclaren - 165mph delorean - 165mph lambo - 160mph cybertruck - 150mph raptor - 135mph little bird - 110mph crew capsule - 90mph stunt - 70mph \$50k+ challenger - 215mph camper - 135mph towtruck -125mph porsche - 125mph mustang - 125 / 120mph boxer - 120mph ambulance - 115 / 110mph classic - 110/95mph ATV- 85mph \$0k+ cruiser - >300mph (unstable) jetski - >220mph (unstable) bank truck - >210mph (unstable) SWAT - 145mph SUV - 140 /115mph model3 - 135mph free nascar - 135 / 120mph wraith - 130mph dune - 130 / 120mph badger - 130 /120mph interrogator - 125mph jeep - 125 / 120mph mini - 120mph pickup - 120 / 110mph patrol - 120 / 105mph camaro - 115mph dirtbike - 110 /100mph deja - 105 / 100 mph heli - 100mph All tests have been conducted with the new speedometer readings (accurate to the one in-game). Customization loadout: Vantablack all-over, Vantablack void rims, regular tires, no spoiler. Max engine and brakes. Low suspension to be able to get the smoothest drive with minimal speed fluctuation. Ohio State Senator, using a Zoom background of his home office while driving, debating a bill for harsher penalties for distracted driving. • Ohio State Senator, using a Zoom background of his home office while driving, debating a bill for harsher penalties for distracted driving. • I personally find CarGurus to be the most helpful, easiest to use, and simple to operate, but I'm wondering what the professionals recommend? I'm not yet sure what kind of car I actually want but want to see what my options are. Thanks! Go to dashcams r/dashcams • UPDATED JULY 2024 There are a lot of dashcam options out there, and a lot of them aren't very good. I compiled this list from reddit feedback. Let me know if you have any other recommendations or favorites, and why you like it or what you found useful so we have some real world feedback. Budget: Viofo A119 Mini 2 - Major upgrade over the A119 v3. 1440p resolution but more compact/discrete and has the Sony STARVIS 2 sensor, which is a big improvement for night time quality. Includes some advanced features like HDR and 5ghz Wi-Fi for quick file transfers. In my opinion, this is the best front only cam to get nowadays. B1W Mini - Budget, but a good one. Rotatable lens good for uber/lyft drivers. Garmin Mini 2 - This thing is MINI. Most discrete cam on the market, and decent app functionality. Viofo A229 Plus\*\* - An upgrade over the A129 Duo that gives you 1440p on both the front and rear cam. Also has the Sony STARVIS 2 sensor, which is a big improvement for night time quality. Can fit a 512 gb SD card. This is a good one to get unless you really want the 4k of the front cam. Nexar Beam - 1080p, super compact, and has free cloud back ups. Mid Range and Up: Viofo A229 Pro- The best dual cam, with a front 4k cam and a 1440p rear cam. There is also a 3-channel option for those who want an interior cam (i.e. uber/lyft/tax drivers). Best for users requiring premium coverage with high-resolution video quality and multiple recording angles. Has the Sony STARVIS 2 sensor. Has Wi-Fi, GPS, Bluetooth remote, and super night vision with the Sony STARVIS 2 sensor. Garmin 67W: Good for those wanting a compact dash cam with a wide field of view (180°) and advanced driver alerts like forward collision, lane departure and speed camera warnings. The 1440p resolution and 60fps recording help capture detailed footage. A139 Pro Duo - Upgrade to the A129 with a new chipset that greatly improves night time video. B4K - Newer 4k brother to the B1W, so far good reviews. Blackvue DR900X - Dual Cam/4k and has cloud capability & LTE. Considered one of the best. Blackvue DR970X-2CH - Records front and back, built-in GPS and Wi-Fi, cloud stuff, wide front view. Newest model with best image quality Front & Interior Dual Cams aka Uber/Lyft Cams. Blueskysea B2W - Infrared Capability, budget friendly. Vantrue N2S - Infrared capability, higher end, now capacitor powered. A139 3-Channel - Front, interior, and rear cams, giving almost 360 views. Interior cam is Infrared. Motorcycle Cams. AKASO Action Cam - An action cam, but cost effective. INNOVV K5 Dual MotoCam - Top notch, but expensive. Blueskysea A12 - Mid Range. Fairly priced Accessories: SanDisk 128GB High Endurance - Dashcam optimized. Samsung PRO Endurance MicroSD - Dashcam optimized. Viofo Hardwire Kit - Enables parking mode, battery discharge prevention. Nunet Hardwire Kit - Hardwire kit with pretty much everything you need. Trim Removal Kit - Has all the tools needed to remove trim without damaging it. These are the bulk of them. Dashcams are very useful. In case of an accident, the opposing party can lie about what happened to reduce the likelihood that they are found to be at fault. Happens all the time. Having video of what happened can save you \$1000's in insurance and potential legal fees. Dashcams can also get you out of falsely written tickets. If you don't have a dashcam and are given a ticket for an infraction you didn't commit, it's your word vs the police officer's word. With a dashcam, there is irrefutable evidence to prove your innocence. There is absolutely no reason not to get one. I try to update this list regularly and I hope it's helpful. This is a summary of the 11 NHTSA-reported Autonomous Driving System collisions involving injuries that led to hospitalization, or (in one case) to a fatality, that occurred from June 16 to October 15. (). There were also a couple hundred non-injury collisions in that period, not covered here. 9 of the 11 collisions occurred with no driver/operator in the vehicle. 8 of those 9 were fairly unavoidable due to other drivers' mistakes, 1 of those 9 involves a passenger mistake but might have been avoided with different decisions by the ADS: a Waymo stopped in moving traffic, in response to a passenger request, enabled its hazard lights, and allowed the passenger to open a door into the path of an approaching cyclist. In the 2 collisions with safety drivers in the vehicle, one was in a Waymo that sounds like the safety driver messed up an unprotected left, and one was in a Zoox Toyota Highlander (test vehicle) that sounds like the driver might have messed up a protected left by not noticing an oncoming idiot. For an unstated reason, "The Zoox vehicle operator disengaged just prior to the signal turning from flashing yellow to green arrow as they continued to execute the left turn." An oncoming car ran a red at high speed and hit the Zoox. While the other car's operator made an error, it's possible (this is just conjecture) that the Zoox ADS saw the oncoming car and wouldn't turn, and the driver didn't see it, so overrode the ADS. Summary of the 11 incidents, including NHTSA report IDs: 30270-11861, Waymo, Oct 2025, San Francisco, rear ended in motion (18 mph) by motorist, minor injury w/ hospitalization, all passengers belted 30270-11841, Waymo, Oct 2025, Atlanta, rear ended while stopped at stop sign (0 mph) by motorist, moderate injury w/ hospitalization, NOT all passengers belted 30270-11806, Waymo, Sep 2025, Atlanta, side impacted in motion (19 mph) by cyclist who ignored stop sign, minor injury w/ hospitalization, no passengers 30270-11794, Waymo, Sep 2025, Atlanta, side impacted in motion (19 mph) by vehicle hit by motorist who ran red, minor injury w/ hospitalization, all passengers belted 30270-11789, Waymo, Sep 2025, Los Angeles, front impacted while stopped at light (0 mph) by motorist who crossed double yellow line, minor injury w/ hospitalization, all passengers belted 30270-11713, Waymo, Sep 2025, Tempe, rear ended while slowed to turn (8 mph) by motorcyclist who then landed in path of motorist in neighboring lane, fatality, no passengers 30270-11433, Waymo, Aug 2025, San Francisco, side impacted while stopped (0 mph) by a turning semi truck, minor injury w/ hospitalization, all passengers belted 30270-11403, Waymo, Jul 2025, Santa Clara, Waymo test driver made unprotected left (25 mph) into path of oncoming SUV, moderate injury w/ hospitalization, all passengers belted 30610-11405, Zoox, Jul 2025, Las Vegas, Zoox test driver made protected left (16 mph) into path of car that ran red, minor injury w/ hospitalization, all passengers belted 30270-11192, Waymo, Jun 2025, San Francisco, side impacted while stopped (0 mph) by motorist exiting parallel parking, minor injury w/ hospitalization, all passengers belted 30270-11205, Waymo, Jun 2025, San Francisco, stopped in traffic lane (0 mph) with hazards on when passenger opened door into path of cyclist, minor injury w/ hospitalization, NOT all passengers belted (passenger was preparing to exit) After many weeks of consideration and contemplation with all the feed back Ive been seeing both positive and negative i decided to jump into the fire. Hopefully this goes well and I'll have updates to hopefully either alleviate some fears or help people out from making a bad decision. Decided to get it delivered, and have caravans root insurance with no protection or gap coverage (car is around 16k and did a bit more than 20% downpayment) Update had some trouble trying to verify my identity since you need to have insurance verification, a SSA-98 form, and the contract signed before a certain deadline or your car is cancelled i did everything but for some reason my SSA was rejected constantly making me miss a deadline and worry and stress me however An advocate(costumer support) was able to help me out and fixed everything without delaying my car So far so good Good news i was able to get everything verified and every document signed and am waiting for my car tomorrow wish me luck Car has arrived it looks great runs pretty good gonna take it for an inspection soon so far so good Go to E90 Stellantis slams LA influencers for 'destructive' Jeep Recon video Anyone can view, post, and comment to this community 181K 6.1K Wiki Resources FAQ No insults/personal attacks/claims of mental illness No trolling/being disruptive No abusive speech based on race, religion, sex/gender, or sexual orientation No ableism or fat/body-shaming No stigmatization of substance users or people experiencing homelessness or poverty No harassment, threats, or advocating violence You may attack ideas, not each other You can laugh at someone's fragile masculinity without associating it with their body. Posts that are not about structural problems related to cars are off-topic. Do not post: Literal car fucking. Road rage videos. Things that happened somewhere else on Reddit. We're not a drama sub. Not officially affiliated with r/fuckcars. c/fuck cars A sister/copycat community on Lemmy.ml Not officially affiliated with r/fuckcars. Moderator list hidden. Learn More View all moderators hi all - i wanted to get input on where redditors search for used cars. is it the typical outlets like cars.com/autotrader? do you look at ebay/craigslist? maybe some enthusiasts browse the forums? maybe some quick points on the positives and negatives, and what you find useful for each. on a side note: I built a car forum classifieds search engine during my free time as a project/hobby - mainly because I enjoy browsing various car forums to see what cars I can afford at any given time. Shared this on a few other forums and got positive feedback so thought i should spread the love. The inspiration for this project was a clean green/caramel e46 6spd i missed out on years ago. Any thoughts/feedback would be appreciated!
