We all remember the Scrabble board game from our childhood - and now, in line with an ever more digital world, the game is also available for the computer with Scrabble Blast! In Scrabble Blast, players can play either alone or multiplayer with friends and family members to compete to win the highest scores by creating words of ever greater complexity. What is Scrabble Blast? Scrabble Blast is the digitalized version of the traditional Scrabble board game that so many of us grew up with and was originally launched (to great success) in 2005. The game is much like the original version but with a few key differences. Scrabble Blast can be played single-player or multi-player, and there are

three game modes for players to try: Puzzle: Extra points available for making words of specified lengths; a more strategic gameplay experience Action: Create words as quickly as possible for an intense and extra fast-paced compared to the standard modes. As the game progresses, time limits get shorter and shorter to add extra pressure! Bag: Create as many words from 100 Scrabble tiles as possible to score as many points as you can The most apparent of the overall differences is that Scrabble Blast – as you might infer from the name – is designed for rapid gameplay. Unlike the traditional board game, which could easily last for an hour or longer, Scrabble Blast is fast-paced and quick, making it an exciting take on the original. A benefit that many traditional Scrabble players will likely appreciate is the inclusion of the original Scrabble dictionary in the app, so all words are automatically spell-checked; this is a great way to avoid family disputes and conflicts during the game! Rating and Similar Games Overall, we give Scrabble Blast a 7/10. It's not a bad version of Scrabble in the slightest, and those of us who played it as children will likely enjoy the nostalgia and memories as well. The fast-paced nature and inclusion of the Scrabble dictionary is also a very welcome change – but the average graphics quality may put some players off. It's very similar to many other puzzle games such as Boggle or Rummikub. 7! you remember playing Scrabble growing up, then you may want to give the Scrabble Blast digital game a try. It's much faster than the original, and the inclusion of the original Scrabble dictionary may make it a more versatile option for players who otherwise may not have played. Pros Scrabble Blast is a fast-paced, rapid version of the traditional Scrabble board game makes Scrabble Blast more exhilarating and competitive overall. The inclusion of the original Scrabble dictionary makes choosing and placing words easier, and avoids disputes and conflicts. Scrabble Blast can be played alone against the AI or with family members and friends, making it a great single-player or multi-player option! Three game modes help ensure that players stay engaged with the game, even if they've played multiple times before. Cons As with the original board game, Scrabble Blast may not be a game for everyone; while some people will love it, others may be more hesitant. The graphics in Scrabble Blast are a little basic and haven't necessarily aged well. View more screenshots It's the classic updated. Scrabble bonus squares multiply your word in various ways. double letter, triple letter, double word, and triple word - are all in the game. There are three play modes: score as many points as possible with 100 tiles; Puzzle mode features number bombs - make words of a certain length and they explode; Action mode tests your Scrabble speed as the bombs fall faster and faster. Look for Similar Items by Category Feedback Advertisement Advertisement GAME CATEGORY: Board, Card & Casino, Kids, Puzzle Our version of SCRABBLE BLAST works without Flash Plugin! Enjoy a free online scrabble game, in which your goal is to find various words hidden on the board and try to score as many points as you can by finding the longest possible words and crossing the bonus fields. There are also additional game extensions as Bombs, which can explode if you don't defuse them by putting a minimum-length word on the board. Have fun, playing SCRABBLEBLAST! Game Controls: Mouse The basics of Scrabble Blast are easy, just click on adjacent tiles to create words. You can create sequences of tiles that are next to each other horizontally, vertically or diagonally. Create words with high value tiles and use the Bonus Fields to score as many points as possible. Once you are satisfied with the word you created, press the 'Score' button on the left to submit the word. You can also automatically submit a word by selecting all letters of a word without releasing the mouse in between. This allows you to create and submit words faster. After you submit a correct word, its letters are removed from the board. The letters above the removed letters fall down and new letters are added at the top of the board. Beware of the Number Bombs, because if they reach the bottom of the board it is game over. The bombs fall every move you make. You have to defuse these bombs by creating a word of a minimum length with them. You need to create 10 words to complete a level and advance to the next. Bonus fields On the game board there are several bonus fields, each giving you a higher score when used in a word: Double letter: Indicated in grey, including the letter on this tile results in doubling of the letter score Triple letter: Indicated in blue, including the letter on this tile results in tripling of the letter score Double word: Indicated in pink in the center of the board, including the letter on this tile results in doubling of the word score Triple word: As of level 3, indicated in red, including the letter on this tile results in tripling of the word score Score ranks Based on your score, you will be awarded a certain score rank: Neophyte if you score below 100 points. Amateur if you score 100 points or more. Beginner if you score 250 points or more. Junior if you score 500 points or more. Novice if you score 750 points or more. And so on... I didn't manage to go higher than Novice, let me know the highest rank you have reached! Strategy tips Try to link up double and triple word bonuses to get really high points Try to find high scoring tiles (Z or W) on triple or double squares, or try to move high scoring tiles to such bonus squares If you find a word, look for the 'S' tile to make it plural If you find a word, try to see if you can use a suffix like 'ED', 'ER', 'ING' or 'TION' to make it even longer Look for suffixes like 'ING', 'TION' or 'ER' to create words with Look for prefixes like 'PRE' and 'UN' to create words with History Scrabble Blast for Windows was developed by funkkitron and released in 2004. The version for Game Boy Advance was developed by Visual Impact and released in 2005. The version for Game Boy Advance had several additional game modes: Action mode: Create words with Number Bombs, but be quick because the bombs fall faster and faster. Bag mode: Create as many words as you can and get the highest score possible with 100 tiles. Puzzle mode: Create words with length indicated on Number Bombs to get extra points. Scrabble Blast also used to be available as an app, but the app has been discontinued. Similar games Scrabble Blast gameplay is similar to Bookworm, one of our most popular word games. Scrabble fans can also try the fast-paced Scrabble Sprint game. If you enjoy word games, you might also enjoy Text Twist 2 or Word Ruffle. Scrabble Blast, developed by Funkitron, brings you this all-time favourite word game with a number of new features, and as challenging and fun as ever. Playing Scrabble is really fun and easy, apart from being educational and suitable for all family members. What you have to do is to connect adjacent tiles and form words, with no less than three letters. Of course, if you manage to form larger words your score will improve and you may even get a new and higher rank, being newbie the lowest. You will need a lot of concentration since there is seven letter word somewhere to discover. In Scrabble Blast, there are three game modes to play, each one with a different challenge. The 1 Bag mode, provides you with one hundred tiles, to form as many words as you can with that amount of tiles. The Puzzle mode in turn, introduces the dangerous bomb tiles, that you have to use in words, otherwise, if they reach the bottom of the screen and remained unused, they will explode and the game is over. The last mode, called Action, challenges your speed to make up words as quickly as possible, before the bomb tiles reach the bottom. As with all classic games, you will never get tired of playing Scrabble: it is so fun and addictive it will keep you coming back for more.
