This little app recognizes all Bluetooth devices at your fingertips, when your old one normally doesn't. Connect and share your files with one click.The only thing more annoying than not seeing your Bluetooth in the device list is not knowing how to make it look. This Bluetooth driver will help you. Bluetooth Driver Installer has a wide range that detects all active devices. You will see your device and any other devices in the area. This is an accurate feature, as you can see who is using what within this range. It also makes for convenient file sharing. The downside is that the computer becomes visible to all users nearby. You can avoid this by changing your network settings, although it might interfere with some features. You can install this application only from the main website. Trying to download it elsewhere can cause malicious malware or other damage to your computer. It works even better on Intel. It is not possible for the same results to occur with other processors. Installing this Bluetooth driver forces you to get rid of the old one. It won't work right away. There are very specific steps you need to take to start using it like scanning for hardware changes and creating a restore point. Older PCs may need several reboots. File sharing is quick and easy with this application and is compatible with most hardware on the market. You may find some errors during the process, but don't interfere or damage the files. When this happens, you will need to restart the app or PC. Where can you run this program? You can run this application on Windows XP, Windows Vista, Windows 8 and Windows 10. Is there a better alternative? Thank you. If you have an Intel processor, chances are you already have a default Bluetooth stack. It does the same things as this application without the installation problems.Although it has many problems, the installer will do exactly what the developers intended. If you happen to run into Bluetooth device issues on a daily basis, consider using this app. Should you unload it? Not True Sometimes the problem lies in Bluetooth devices and not in the PC.
