With Cusbuzz, you can view accurate and updated information on import duty rate in India, and plan your costs effectively. Our platform simplifies the calculation of import duty in India with a user-friendly Custom Duty calculator, ensuring you never miss a detail. Start using our Custom Duty calculator today and streamline your imports effortlessly! The HS Code 09091000 refers to seeds of anise or badian. In this article, we will explore the details and significance of this HS code, including its product description, duty rates, quantity unit, and special tariff preference programs. Let's delve into the world of anise and badian seeds! Product Description Anise and badian seeds are widely used in culinary and medicinal applications. These seeds come from plants known as Pimpinella anisum and Illicium verum, respectively. Anise seeds have a distinct licorice-like flavor and are commonly used as a spice in various cuisines. Badian seeds, also known as star anise, have a similar taste profile but with a more intense and aromatic flavor. The HS Code 09091000 specifically covers the seeds of anise or badian, which are typically used for their flavor and fragrance properties. These seeds are harvested, processed, and packaged for distribution in the international market. Bound / MFN Duty Rate The bound or Most Favored Nation (MFN) duty rate for HS Code 09091000 is free. This means that whenever a country lowers a trade barrier or opens up a market, it must apply the same duty-free treatment for the import of seeds of anise or badian from all its trading partners. This duty rate encourages the free flow of these seeds across borders, fostering international trade and ensuring equal treatment among trading nations. It promotes fair competition and allows consumers in different countries to have access to high-quality anise and badian seeds at competitive prices. Quantity Unit The quantity unit for HS Code 09091000 is kilograms (KG). This unit of measurement is used to determine the weight of the imported or exported seeds of anise or badian. It helps in calculating the quantity of seeds involved in trade transactions and ensuring accurate documentation and pricing. Special Tariff Preference Programs HS Code 09091000 is eligible for several special tariff preference programs in various countries. These programs provide additional benefits, including duty-free treatment or special rates, for the import of anise and badian seeds. The following countries participate in these programs: Australia (Special Rate) Bahrain (Special Rate) Canada (NAFTA - duty-free treatment) Chile (Special Rate) Caribbean Basin Initiative (CBI) Israel (Special Rate - duty-free treatment) Andean Trade Preference Act (ATPA) Jordan (Special Rate) Morocco (Special Rate) Mexico (NAFTA - duty-free treatment) Oman (Special Rate) Dominican Republic-Central American (DR-CAFTA) (Special Rate) Peru (Special Rate) Singapore (Special Rate) These special tariff preference programs aim to promote trade and economic cooperation between countries. They provide incentives for importing anise and badian seeds from specific trading partners, thereby fostering strong bilateral relations and benefiting businesses engaged in the seed trade. Importing US States HS Code 09091000 allows the import of seeds of anise or badian to various states within the United States. The exact importing states may vary depending on market demand and distribution channels. However, some of the prominent importing states for these seeds include: California Texas Florida New York Illinois These states serve as major hubs for international trade and have a significant demand for anise and badian seeds, both for domestic consumption and further distribution to other states. Exporting US States HS Code 09091000 enables the export of seeds of anise or badian from various states within the United States. The exporting states may vary depending on factors such as agricultural production, processing facilities, and trade agreements. Some of the leading exporting states for these seeds include: California Florida Washington Georgia Oregon These states have favorable climatic conditions and advanced agricultural practices, allowing them to produce high-quality anise and badian seeds for the international market. Their export activities contribute to the growth of the seed industry and promote economic development within the respective states. HS Code 09091000 plays a crucial role in facilitating the international trade of anise and badian seeds. It ensures fair treatment, encourages trade liberalization, and opens up opportunities for businesses engaged in the seed industry. The duty-free treatment and special tariff preference programs further enhance the competitiveness and accessibility of these seeds in the global market. Whether you're a consumer, importer, or exporter, understanding this HS code is essential for engaging in the trade of anise and badian seeds.
