Right click on the green NAP title bar in the Simology panel to open the NAP voting panel of the current neighborhood (even if your Sim does not live in this neighborhood). To install, simply extract the zip file and place both the package file and the script file in your mods folder. If cheat windows do pop up but nothing happens after entering a value, this means the package file is installed correctly but the script file isn't. Make sure the script file is installed no more than one subfolder level deep and "Script Mods Allowed" is toggled on in the options menu.
