Preparation of sulfanilic acid from aniline pdf

Wouldn't there be some ortho-sulfanilic acid created as well? I suppose it would be much less than 50% due to the bulky sulfonate group, but surely it's not all the para, right? I'm referring to Axt's picture. I've been trying to apply what I've been learning in organic to interpreting things on the forum so some input would be really helpful and appreciated. "There must be no barriers to freedom of inquiry ... There is no place for dogma in science. The scientist is free, and must be free to ask any question, to doubt any assertion, to seek for any evidence, to correct any errors. ... We know that the only way to avoid error is to detect it and that the only way to detect it is to be free to inquire. And we know that as long as men are free to ask what they must, free to say what they think, free to think what they will, freedom can never be lost, and science can never regress." - J. Robert Oppenheimer Main ChEBI Ontology Automatic Xrefs Reactions Pathways Models 4-aminobenzenesulfonic acid ChEBI:27500 An aminobenzenesulfonic acid that is aniline sulfonated at the para-position. This entity has been manually annotated by the ChEBI Team. ChEBI:1782 Molfile XML SDF more structures >> Molfile InChI=1S/C6H7NO3S/c7-5-1-3-6(4-2-5)11(8,9)10/h1-4H,7H2,(H,8,9,10) HVBSAKJJOYLTQU-UHFFFAOYSA-N environmental contaminant Any minor or unwanted substance introduced into the environment that can have undesired effects. Bronsted base A molecular entity capable of accepting a hydron from a donor (Bronsted acid), (via organic amino compound) allergen A chemical compound, or part thereof, which causes the onset of an allergic reaction by interacting with any of the molecular pathways involved in an allergy. xenobiotic metabolite Any metabolite produced by metabolism of a xenobiotic compound. xenobiotic A xenobiotic (Greek, xenos "foreign"; bios "life") is a compound that is foreign to a living organism. Principal xenobiotics include: drugs, carcinogens and various compounds that have been introduced into the environment by artificial means.
